For epoxy resin add A\$1850

Spec 4-pre-preg hull	Resin	Matt	
----------------------	-------	------	--

Hull	Prepreg epoxy	Woven Carbon	
Deck	Vinyl ester	Woven carbon to foredeck and main bulkhead and chute Woven glass to sidetanks	A\$16,650

Spec 5-Full prepreg	Resin	Matt	
Hull	Prepreg epoxy	Woven Carbon	
Deck	Prepreg epoxy	Woven Carbon	A\$20,550

Note

1. Additional layers of Chopped strand matt are used over the woven matt on the top of the seat tanks to improve impact resistance in glass boats
2. Bare hull includes toe strap attachment points, 3 inspection ports, mast step (proctor), 1 bailer, forestay fitting and block and inbuilt sidestay Harken turning blocks plus tubes through to forward compartment, 3 Leader blocks to sidetanks on each side and mast ram attachment to foredeck. This will save a lot of time in the fitout as these systems are difficult to do yourself and are done at cost price. We can delete all these at a saving of A\$1000
3. All hulls and decks are fully cored with balsa to floors and foam to sidetanks. Mast step cored with marine ply for extra strength. Prepreg hulls cored with nomex honeycomb in all areas except sites of attachments of fittings on casecap and some vertical surfaces of sidetanks. This greatly simplifies fitout of the nomex cored boats.
4. We can provide all fittings and ropes for you to fitout according to our standard spec and also provide a comprehensive fitout guide . Fittings are sold at cost and our bulk wholesale purchasing power results in major savings . Alternatively we can do the fitout for you. POA.
5. Colour- one colour hull and one colour (may be different to hull) deck quoted. Prepreg hulls are spray painted with extra coats for cutback to owners own reqts.
